

THREATQ™ AND CPX

Technology Segment: Threat Intelligence

Empowering national security: CPX and ThreatQuotient collaborate to strengthen UAE's cyber threat intelligence

THREATQ BY THREATQUOTIENT™

The ThreatQuotient solutions make security operations more efficient and effective. The ThreatQ data-driven threat intelligence platform is both open and extensible, supporting the integration of disparate security technologies into a single security infrastructure, automating actions and workflows so that tools and people can work in unison. Empowered with continuous prioritization based on their organization's unique risk profile, security teams can focus resources on the most relevant threats, and collaboratively investigate and respond with the aim of taking the right actions faster.

CPX CYBER MANAGED SERVICES

In today's interconnected world, cybersecurity is a top business priority, especially for organizations operating in critical sectors. As cyber threats become more sophisticated and frequent, staying ahead requires robust threat intelligence and proactive defense strategies. CPX, a leading provider of cybersecurity solutions based in Abu Dhabi, and ThreatQuotient, a prominent threat intelligence platform, have joined forces to bolster the UAE's cyber resilience capabilities.

CPX provides end-to-end cybersecurity services to ensure organizations are compliant with stringent cybersecurity standards, and accelerates cyber maturity with robust cyber resilience services and solutions. Meanwhile, ThreatQuotient is a leading threat intelligence platform that transforms security operations through the fusion of disparate data sources, tools, and teams, accelerating threat detection, investigation and response (TDIR).

INTEGRATION HIGHLIGHTS

Overview

Industry: Technology
Partner since: 2023

CPX location: Abu Dhabi, United Arab Emirates

Objective

CPX partnered with ThreatQuotient to enhance its Cyber Threat Intelligence (CTI) services, improving detection, response, and proactive defense strategies.

Partnership

CPX and ThreatQuotient are partnering to develop an advanced Cyber Threat Intelligence (CTI) Service to monitor and understand cyber threats in the UAE. By combining ThreatQuotient's intelligence platform with CPX's services, they aim to help organizations mitigate threats and achieve cyber resilience.

Outcome

- Customized threat intelligence services for clients in the UAE
- Leading expertise in tracking and investigating the UAE attack landscape

CYBER THREAT INTELLIGENCE PLATFORM

The partnership between CPX and ThreatQuotient centers around developing a cutting-edge Cyber Threat Intelligence (CTI) big data platform. This platform is dedicated to monitoring and understanding cyber threats targeting critical sectors within the UAE and the national threat landscape. By integrating ThreatQuotient's advanced threat intelligence capabilities with CPX's Cyber Managed Services, the collaboration aims to empower organizations to effectively mitigate threats and achieve cyber resilience.

ADDRESSING CYBERSECURITY CHALLENGES TOGETHER

CPX wanted to enhance its CTI services to further fortify its cybersecurity service offerings. The organization collaborated with ThreatQuotient to integrate advanced threat intelligence for enhanced detection and response capabilities, and proactive cyber defense strategies, including threat hunting and vulnerability management. The collaboration has helped CPX better manage and analyze a growing volume of threat intelligence to provide actionable insights through its Security Operations Centers (SOCs).

JOINT OUTCOMES

The collaboration between CPX and ThreatQuotient has yielded significant outcomes:

- Customized threat intelligence: Since the ThreatQ platform is open, CPX is able to adapt collection, research, analysis, and reporting driven by client requests. This customized CTI service allows them to share the right intelligence at the right time and to the right tools based on the client's environment, industry, or interest, so clients can transform their security posture to be more proactive.
- Expertise in the UAE cyber landscape: CPX unifies legacy data, supports regulatory compliance, and delivers robust monitoring and protection against cyberattacks. The collaboration and visualization enabled by the ThreatQ platform has positioned CPX as an integrated cybersecurity provider capable of supporting mature defense plans against the rapidly evolving threat landscape.

Through their collaboration, CPX and ThreatQuotient have established a unique partnership that significantly enhances the UAE's cyber threat intelligence capabilities. By integrating advanced cybersecurity services with robust threat intelligence solutions, the two organizations can provide proactive defense strategies for critical sectors. This partnership underscores the commitment to empowering national security and addressing the dynamic challenges of the cyber threat landscape.

ABOUT THREATQUOTIENT™

ThreatQuotient transforms security operations through the fusion of disparate data sources, tools, and teams, accelerating threat detection, investigation and response (TDIR). Their data-driven threat intelligence platform facilitates teams in prioritizing, automating, and collaborating on security incidents, refining decision-making processes and resource utilization. By integrating existing processes and technologies, they create a cohesive workspace, minimizing noise, pinpointing key threats, and enabling precise process automation with high-quality data.

ABOUT CPX HOLDING

CPX, headquartered in Abu Dhabi, is a leading provider of digital-first cybersecurity solutions and services. Established in 2022, CPX protects public and private sector organizations with customized solutions that reduce the risk of sophisticated cyberattacks. We provide clients and partners with end-to-end cybersecurity capabilities to ensure compliance with stringent cybersecurity standards and accelerate their cyber maturity. Learn more at www.cpx.net.
